

Recoil pads for Benelli Comfortech stocks

Arve2 June 07, 2025

Summary

Summary

I made this recoil pad for a Benelli Comfort shotgun. Since the original parts are interchangeable between all Benelli models with "Comfortech" stocks, I suppose it should work with Benelli M2, Argo and so on as well. Personally, I needed a 10mm recoil pad, but since I now have the shapes figured out, I'm posting a 25mm and 45mm version as well. There is also an F3D drawing, if you want to remix this in Fusion 360 to any other height or shape.

The design is press-in, just as the original, so you need to print this in a soft material such as TPU. I used NinjaFlex @15% infill and full supports.

Please leave a comment if this design helped your hobby.
